

# Care & Maintenance

## Satin Etch Glass

### General Cleaning

- ≠ Clean using a soft wet cloth
- ≠ Use warm water only
- ≠ Clean the full panel, spot cleaning can often appear obvious when dry
- ≠ Do not use harsh chemicals
- ≠ Buff dry to ensure an even appearance
- ≠ For best results, use a clean white rag

### Stain Removal

- ≠ Use bio-degradable Gumption Paste (available in supermarkets) to remove oily or adhesive stains
- ≠ A lightly abrasive scouring pad can be used on stubborn stains
- ≠ Ensure you use plenty of clean warm water
- ≠ Clean the full panel, spot cleaning can often appear obvious when dry
- ≠ Remove paint immediately whilst still wet

### About the product...

Satin Etch Glass (Acid Etch) has a slightly absorbent surface on one side due to the manufacturing process which can increase the risk of staining. Use our simple care & maintenance guide to ensure your glass maintains its fresh appearance & continues to complement your home or office.
